

A03 Project Proposal

Unity Hangman

A reinvention of our first assignment for the class, we will undertake a whole new set of skills by learning a new development framework called Unity. We will begin with a basic framework, then add features until we run out of development time.

UML

Food Recommender

Use data from user's eating habits as well as nutrient data from a database to compile and recommend new dishes to balance out deficiencies.

Hangman Tasks		
Date	Assigned to	Task
